

## **Minfocus Exploration Announces Debt Settlements of over \$462,000 with Four Related Parties**

**May 26, 2017 – Minfocus Exploration Corp. (TSX-V: MFX) ("Minfocus" or the "Company")** is pleased to announce that it has completed agreements for the settlement of outstanding related-party debt totaling just over \$462,000 in exchange for the issuance of shares at a deemed value of \$0.05 per share.

The outstanding related party debt that has been settled is comprised mostly of work performed and expenses incurred to the credit of the various Minfocus exploration projects and/or work commitments on earn-in option agreements related to them.

These agreements for the issuance of the shares-for-debt will not create a New Control Person as defined under TSXV policies. The completion of the shares-for-debt transactions contemplated in these agreements remain subject to the approval of the TSX Venture Exchange.

### **Coral Zinc Project – 2017 Air and Ground Surveys and Drilling Program**

The Company intends to undertake a drilling program this summer on its CORAL Project in east central British Columbia to follow up on the 2016 exploration results targeting zinc and lead mineralization in a low-iron Mississippi-Valley-Type, carbonate rock geological environment analogous to that hosting the Pine Point deposits. The property has historic core drilling and trenching intersecting mineralized breccias containing zinc and lead values of up to 7.8% zinc. Minfocus has a current Mines Act Permit authorizing drilling at up to 6 drilling sites in 2017. The primary drilling target is the source of the large (600m x 300m) zinc geochemical anomaly (15-50 times background zinc levels) with outcropping zinc mineralized brecciated dolostone at its edge. In addition to drilling, Minfocus intends to undertake air and ground geophysical work and a LIDAR survey, to enhance selection of drill targets during the 2017 program. For more details, see the Minfocus website at [www.minfocus.com](http://www.minfocus.com).

### **About Minfocus Exploration Corp.**

Minfocus Exploration Corp. is a Canadian company currently advancing a portfolio of base metal and precious metal projects including zinc and nickel projects in British Columbia and a Platinum Group Element ("PGE") rich nickel project in N.W. Ontario. Minfocus has a successful management group with a record of multiple discoveries of deposits worldwide, including gold and uranium deposits in Mongolia and PGE-rich resources in Ontario, including the discovery of the first Platinum-rich Pt-Pd-Cu-Ni deposit, the Current Lake deposit (+700,000 oz. Pt-Equivalent) which is hosted within the mid-Continental Rift.
